No part of this publication may be reproduced or transmitted in any form, or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission in writing from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (21 Congress Street, Salem, Massachusetts 01970), for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1982 articles are the same as those shown for current articles.

Contents of Volume 92

NUMBER 1, JULY 1982

DAVID A. NEWSOME, ELIZABETH D. HAY, AND KENNETH R. KENYON. Chris Coulombre—A Tribute ... 1

Full Papers

JAMES A. BEE. The Development and Pattern of Innervation of the Avian Cornea ... 5

AKIRA HAYASHI, PATRICIA K. DONAHOE, GERALD P. BUDZIK, AND ROBERT L. TRELSTAD. Periductal and Matrix Glycosaminoglycans in Rat Mullerian Duct Development and Regression ... 16

ROBERT L. TRELSTAD, AKIRA HAYASHI, KIMIKO HAYASHI, AND PATRICIA K. DONAHOE. The Epithelial-Mesenchymal Interface of the Male Rat Mullerian Duct: Loss of Basement Membrane Integrity and Ductal Regression ... 27

JYH-JIA W. YANG AND S. ROBERT HILFER. The Effect of Inhibitors of Glycoconjugate Synthesis on Optic Cup Formation in the Chick Embryo ... 41

DAVID C. BEEBE, PAMELA J. COMPART, MARTHA C. JOHNSON, DOUGLAS E. FEAGANS, AND RICHARD N. FEINBERG. The Mechanism of Cell Elongation during Lens Fiber Cell Differentiation ... 54

JACQUES A. TRÉTON, TOSHIMICHI SHINOHARA, AND JORAM PIATIGORSKY. Degradation of δ-Crystallin mRNA in the Lens Fiber Cells of the Chicken ... 60

JANE OVERTON. Inhibition of Desmosome Formation with Tunicamycin and with Lectin in Corneal Cell Aggregates ... 66

JONATHAN B. L. BARD AND ALLYSON S. A. ROSS. The Morphogenesis of the Ciliary Body of the Avian Eye. I. Lateral Cell Detachment Facilitates Epithelial Folding 73

JONATHAN B. L. BARD AND ALLYSON S. A. ROSS. The Morphogenesis of the Ciliary Body of the Avian Eye. II. Differential Enlargement Causes an Epithelium to Form Radial Folds ... 87

STEPHEN P. SUGRUE AND ELIZABETH D. HAY. Interaction of Embryonic Corneal Epithelium with Exogenous Collagen, Laminin, and Fibronectin: Role of Endogenous Protein Synthesis ... 97

JAMES J. TOMASEK, ELIZABETH D. HAY, AND KEIGI FUJIWARA. Collagen Modulates Cell Shape and Cytoskeleton of Embryonic Corneal and Fibroma Fibroblasts: Distribution of Actin, α-Actinin, and Myosin ... 107

JAMES A. BEE, NATALIE C. UNRUH, DAVID L. SOMMERFELD, AND GARY W. CONRAD. Avian Corneal Innervation: Inhibition of Nerve Ring Formation by 6-Diazo-5-oxo-L-norleucine ... 123

ROBERT L. TRELSTAD. The Bilaterally Asymmetrical Architecture of the Submammalian Corneal Stroma Resembles a Cholesteric Liquid Crystal ... 133

XANTHE VAFOPOULOU-MANDALOS AND HANS LAUFER. The Ontogeny of Multiple Hemoglobins in *Chironomus thummi* (Diptera): The Effects of a Compound with Juvenile Hormone Activity ... 135

THOMAS J. POOLE AND MALCOLM S. STEINBERG. Evidence for the Guidance of Pronephric Duct Migration by a Craniocaudally Traveling Adhesion Gradient ... 144

J. C. REGIER, G. D. MAZUR, F. C. KAFATOS, AND M. PAUL. Morphogenesis of Silkmoth Chorion: Initial Framework Formation and Its Relation to Synthesis of Specific Proteins ... 159

BARBARA R. FISHEL, RICHARD E. MANROW, AND ROBERT P. DOTTIN. Developmental Regulation of Multiple Forms of UDPglucose Pyrophosphorylase of *Dictyostelium* 175

JEANINE KOENIG, ROLAND BOURNAUD, JEANNE A. POWELL, AND FRANÇOIS RIEGER. Appearance of Contractile Activity in Muscular Dysgenesis (*mdg/mdg*) Mouse Myotubes during Coculture with Normal Spinal Cord Cells ... 188

C. D. MCCAIG AND K. R. ROBINSON. The Distribution of Lectin Receptors on the Plasma Membrane of the Fertilized Sea Urchin Egg during First and Second Cleavage ... 197

SAMUEL WARD AND MICHAEL KLASS. The Location of the Major Protein in *Caenorhabditis elegans* Sperm and Spermatocytes ... 203

FRANK TUFARO AND BRUCE P. BRANDHORST. Restricted Expression of Paternal Genes in Sea Urchin Interspecies Hybrids ... 209

AKIHISA KANAMARU, TAKAHIRO OKAMOTO, HIROSHI HARA, AND KIYOYASU NAGAI. Developmental Changes in Erythropoietin Responsiveness of Late Erythroid Precursors in Mouse Hemopoietic Organs ... 221

CINDY A. LEWIS, CRAIG F. TALBOT, AND VICTOR D. VACQUIER. A Protein from Abalone Sperm Dissolves the Egg Vitelline Layer by a Nonenzymatic Mechanism ... 227

ANDRE J. OUELLETTE. Metallothionein mRNA Expression in Fetal Mouse Organs ... 240

MARGERY J. FAIN AND BRYN STEVENS. Alterations in the Cell Cycle of *Drosophila* Imaginal Disc Cells Precede Metamorphosis ... 247

Brief Notes

ILENE K. GIPSON AND TIMOTHY C. KIORPES. Epithelial Sheet Movement: Protein and Glycoprotein Synthesis ... 259

IAN S. MCLENNAN. Size of Motoneuron Pool May Be Related to Number of Myotubes in Developing Muscle ... 263

LESLIE PATMORE AND TUNEO YAMADA. The Role of Calcium in Depigmentation of Iris Epithelial Cells during Cell-Type Conversion ... 266

LESLIE PICK, SUSAN G. SCHIFFER, CRAIG ROBINSON, AND SALOME GLUECKSOHN-WAELSCH. Tyrosine Aminotransferase Induced in Cells Genetically and Epigenetically Deficient for This Enzyme ... 275

Errata

Volume 89, Number 1, January 1982: H. Glenn Hall and Victor D. Vacquier. "The Apical Lamina of the Sea Urchin Embryo: Major Glycoproteins Associated with the Hyaline Layer," pp. 168–178 ... 279

Volume 89, Number 2, February 1982: A. R. Poole, A. H. Reddi, and L. C. Rosenberg. "Persistence of Cartilage Proteoglycan and Link Protein during Matrix-Induced Endochondral Bone Development: An Immunofluorescent Study," pp. 532–539 ... 279

NUMBER 2, AUGUST 1982

Full Papers

DAVID R. MCCLAY AND RACHEL D. FINK. Sea Urchin Hyalin: Appearance and Function in Development ... 285

SCOTT FALKENTHAL, MELISSA L. GRAHAM, EDWARD L. KORN, AND JUDITH A. LENGYEL. Transcription, Processing, and Turnover of RNA from the *Drosophila* Mobile Genetic Element Copia ... 294

JOSEPH FARGNOLI AND GAIL L. WARING. Identification of Vitelline Membrane Proteins in *Drosophila melanogaster* ... 306

Author Index for Volume 92 563

The Subject Index for Volume 92 will appear in the December 1982 issue as part of a cumulative index for the year 1982.

Information for Authors

Developmental Biology will publish papers on problems of development in the broadest sense. Embryonic and postembryonic development, growth, regeneration and tissue repair in plants and animals, and the analysis of these phenomena at the molecular and cellular levels are topics suitable for the journal. Papers on reproductive biology, aging, and teratology will be published only when they bear on developmental mechanisms of general interest. Papers are sought that employ the techniques and concepts of many disciplines including those of biochemistry, biophysics, cytology, experimental morphogenesis, genetics including cell genetics, immunology, neurobiology, physiology, and microbiology, In all areas, analytical rather than descriptive studies will be favored.

Original papers only will be considered. Submission of a manuscript implies the authors' assurance that the same work has not been and will not be published nor is presently submitted elsewhere, and that all persons listed as authors have given their approval for the submission of the paper; further, that any person cited as a source of personal communications has approved such citation. Explicit proof of these implied assurances may be required at the Editor's discretion. Articles and any other material published in *Developmental Biology* represent the opinions of the author(s), and should not be construed to reflect the opinions of the editor(s), the publisher, or the Society of Developmental Biology.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Articles usually do not exceed 15,000 words and must be preceded by an abstract of about 200 words that should be fully intelligible by itself. Brief notes are 2500 words or less, including the bibliography, and should have an abstract of less than 100 words. All papers will be published in English.

Manuscripts should be concise. Full documentation of results in support of conclusions should be combined with maximum brevity compatible with clarity. The discussion section should relate the present work to previous knowledge but should not be expanded into a review of the field. The standard order of sections is: abstract, introduction, materials and methods, results and discussion. Combined results and discussion may be used. In the manuscript acknowledgment, references, footnotes, tables, and figure legends should follow the discussion in that order. All pages of the manuscript should be numbered consecutively and typed double-spaced throughout. Authors should provide a running title of 35 letters and spaces or less. Use footnotes sparingly. Cite them with superscript numbers and type them on a separate sheet. With rare exceptions do not italicize for emphasis.

In the Methods section, authors should draw attention to any particular chemical or biological hazards that may be involved in carrying out the experiments described. Any relevant safety precautions should be described; if an accepted code of practice has been followed, a reference to the relevant standards should be given.

Abbreviations and units should be used consistently. Consult the lists published in the *Proceedings of the National Academy of Sciences (U. S. A.)* the *Journal of Biological Chemistry*, and *Biochemistry* for standard abbreviations which need not be defined. Collect all abbreviations into a footnote and refer to it at the first use of an abbreviation. The use of units should follow the Système International. Use prefixes, e.g., μM, not 10^{-6} M. Note that *M* stands for molar, not mole. Use hr, min, sec, rpm, and cpm without definition, without a period, and without an "s" in the plural (i.e., 20 min).

Figures should be numbered consecutively in the order of their appearance and each should have a descriptive legend. Mark all figures with the author's name.

Line drawings should be made with India ink on smooth white paper or professional-quality drafting paper. Do not submit original line drawings larger in size than 13 × 10 in.; instead enclose smaller prints. Good quality prints are acceptable in any case. Drawings will be reduced as much as is compatible with the complexity of the figure, usually to column or page width. The lettering should be large enough to be at least 1.5 mm high after reduction.

Photographs should be the actual size for reproduction and labeled with letters 2 to 4 mm high. Figures should be planned to fit column (3.5 in., 89 mm) or page width (7.25 in., 184 mm); the depth of each column is 9 inches (228 mm). Sets of micrographs submitted in combinations up to 8 × 10.5 inches (203 × 267 mm) in size usually will be reproduced without reduction. For the best reproduction, provide clear, sharp, glossy prints with adequate contrast. The best results will be obtained if authors match the contrast and density of

all figures appearing on a single plate. Figures that are to appear together as one plate should be mounted on cardboard or paper as close together as possible. The printer will place thin white lines between the figures on each plate. Providing an overlay that indicates the most critical areas of the micrograph will aid in ensuring high-quality reproduction. Give magnifications in the legends or indicate them with a scale marker on the photograph.

The second copy of each manuscript must include good-quality glossy prints of all photographs. Two reviewer's copies should be submitted when originals are oversized or mounted on heavy cardboard.

The author will defray the expense of reproducing color figures.

Tables should be retyped on separate pages and numbered consecutively with Arabic numerals, and each should have a concise heading.

References to the literature should be cited as: Doe (1965) has observed that . . . ; (Doe, 1955); Doe *et al.* (1960) should be used in the case of articles with more than two authors. Use suffixes a, b, etc., following the date to distinguish two or more works by the same authors in the same year (Doe, 1960a,b). Numbered references will no longer be accepted. Arrange literature citations in the bibliography according to the surname of the author, using the following styles:

Hilfer, S. R., and Searls, R. L. (1980). Differentiation of the thyroid in the hypophysectomized chick embryo. *Develop. Biol.* **79,** 107–118.

Markert, C. L., and Papaconstantinou, J., eds. (1975). "The Developmental Biology of Reproduction." Academic Press, New York.

Spiro, R. G. (1972). Study of the carbohydrates of glycoproteins. *In* "Methods in Enzymoloy" (V. Ginsburg, ed.), Vol. 28, Part C, pp. 3–43. Academic Press, New York.

Abbreviate journal titles according to *Chemical Abstracts' Service Source Index.*

Page proofs rather than galleys will be sent. This speeds production. Detailed instructions will be sent with proofs. A quick response and minimal changes on proof are imperative to maintain schedules.

Features will include announcements of meetings and courses in the field of developmental biology, and some meeting reports. Persons interested in preparing meeting reports are encouraged to contact the Editor.

To submit a manuscript, send two copies to Anthony P. Mahowald, Developmental Biology Center E653, Case Western Reserve University, Cleveland, Ohio 44106, Tel (216) 368-3430. Indicate the name, address, and telephone number of the author who should be contacted in editorial matters.
